

Press Release LF14 Linear Filter Changer

Nanomotion Ltd, a subsidiary of Johnson Electric, has introduced its LF14 Linear Filter Changer. Based off of the S787 linear shutter, which uses a solid blade, the LF14 carries two filters, designed for hand held and flight devices. The LF14 provides 14mm travel in 70milliseconds and is designed to be integrated directly over the laser source.

The LF14 has been tested to 350g max shock and 10g rms vibration, operating closed loop, with the ability to hold position without power. It is rated for -40°C to +70°C and can be provided as a filter changer or a NUC shutter (when used with a solid blade).
