This document contains proprietary information and shall be respected as a proprietary document with permission for review and usage given only to the rightful owner of the equipment to which this document is associated.

Limited Warranty

Nanomotion Ltd. (hereinafter NM) warrants the product (other than software) manufactured by it to be free from defects in material and workmanship for a period of time of one year (except those parts normally considered as consumable/expendable components such as motor conditioning brushes). The warranty commences thirty (30) days from the date of shipment.

NM warrants those parts replaced under warranty for a period equal to the remaining warranty coverage of the original part.

NM’s sole and exclusive obligation under this warranty provision shall be to repair, or at its sole option exchange defective products or the relevant part or component, but only if: (i) the Purchaser reports the defect to NM in writing and provides a description of the defective product and complete information about the manner of its discovery within ten (10) days of its discovery; (ii) NM has the opportunity to investigate the reported defect and to determine that the defect arises from faulty material, parts or workmanship; and (iii) the Purchaser returns the affected product to a location designated by NM. These provisions constitute the exclusive remedy of the Purchaser for product defects or any other claim of liability in connection with the purchase or use of NM products.

This warranty policy applies only to NM products purchased directly from NM or from an authorized NM distributor or representative.

This warranty shall not apply to (i) products repaired or altered by anyone other than those authorized by NM; (ii) products subjected to negligence, accidents or damage by circumstances beyond NM control; (iii) product subjected to improper operation or maintenance (i.e. operation not in accordance with NM Installation Manuals and/or instructions) or for use other than the original purpose for which the product was designed to be used.

NM shall not in any event have obligations or liabilities to the Purchaser or any other party for loss of profits, loss of use or incidental, increased cost of operation or delays in operation, special or consequential damages, whether based on contract, tort (including negligence), strict liability, or any other theory or form of action, even if NM has been advised of the possibility thereof, arising out of or in connection with the manufacture, sale, delivery, use, repair or performance of the NM products. Without limiting the generality of the preceding sentence, NM shall not be liable to the Purchaser for personal injury or property damages.
Patents

Nanomotion products are covered under one or more of the following registered and applied for patents.

5,453,653; 5,616,980; 5,714,833; 11,1597; 5,640,063; 6,247,338; 6,244,076; 6,747,391; 6,661,153; 69838991.3; 6,384,515; 7,119,477; 7,075,211; 69932359.5; 1186063; 7,211,929; 69941195.5; 1577961; 4813708; 6,879,085; 6,979,936; 7,439,652; 7061158; 1800356; 1800356; 1800356; 2007-533057 (pending); 2011-093431 (pending); 7,876,509; 10-2007-7009928 (pending); 200780019448.6; 7713361.9 (pending); 12/294,926 (pending); GB2008000004178 (pending); GB2009000003796 (pending); 12/398,216 (pending); GB2446428; 12/517,261 (pending); 08702695.1 (pending); 10-2009-7017629 (pending); 12/524,164 (pending); 12/581,194 (pending)

About this Guide

Scope

This user guide provides instructions for connecting and operating the Shutter Evaluation Kit. The document describes the Shutter Evaluation Kit components, functionalities, operation modes, hardware and electrical specifications, and NM proprietary software.

1 Safety

⚠️ WARNING!

For safe usage of the Shutter Evaluation Kit, carefully read the following instructions:
1. Turn off power before connecting or disconnecting any of the cables.

2 Overview

The closed loop shutter evaluation kit allows the user to evaluate NM shutter technology.

The Shutter Evaluation Kit is provided as an autonomous unit, based on the RS08 NUC (Non-Uniformity Correction) Shutter series solution (read more information on www.nanomotion.com), allowing a simple interface to customer FPGA/PC. The kit supports two modes of operation: the GUI Mode, and the FPGA Mode. The GUI Mode, enables the user controlling the kit using the NanoCommander application, installed on user's PC. The FPGA Mode enables the user control the kit using the I2C communication.

The RS08 NUC Shutter is designed to meet the most challenging operating conditions of infrared imaging systems (thermal sensors). The RS08 shutter operates with a direct drive EDGE motor (the smallest industrial motor of its kind available in the marketplace today), providing the lightest weight configuration while maintaining the closest proximity to the imaging detectors's Focal Plane Array (FPA) the imaging lens.
3 Main Components and Features

Following is a list of the main components and features of the Shutter Evaluation Kit:

- Shutter Module
- Closed loop control allowing either PC or I2C input
- 5Vdc power supply
- NanoCommander application software
- Script with basic execution of open/close

The following elements are provided with the Shutter Evaluation Kit:

6 Connecting and Running the System

The connections are set according to the desired operation mode:

- GUI Mode – a configuration using the NanoCommander application.
- FPGA Mode – a configuration using $\text{I}^2\text{C}$ communication.

6.1 The GUI Mode Configuration

When using the GUI Mode configuration, the Shutter-Eval-CL system is connected to the user’s PC and the Shutter Module ASIC is controlled via the NanoCommander application.
6.1.1 Installing the NanoCommander Application

Install the NanoCommander application according to the following steps:

1. Insert the provided USB flash drive into your USB connection.
2. Drivers for the communications card are automatically installed.
3. Browse to the USB Flash Drive to …\RS08 DOCUMENTS\InstallationDisk\ and double-click setup.exe.
4. If Microsoft .NET is not installed on the computer a dialog asking to install is displayed. Click Accept.

**Note:**

In case the NanoCommander dialog appears automatically at the end of the installation process, close the dialog and re-launch NanoCommander from the icon or from the Start menu.

5. In the Application Install dialog click Install.

6. Double-click the icon to launch NanoCommander.
6.1.3 Connecting the System

1. Connect the USB cable between the PC USB and the J2 on the Comm board.
2. Connect the 5V power supply cable to J3 (inner pin is +). DL3 lights.

Note:

The Eval Kit is supplied with a universal power supply plug kit. Choose the power supply connector corresponding to the local standard.

6.1.4 Running the System

Setting up Communication with the Comm Card

Set the following parameters in the NanoCommander dialog:

- **Address**: choose A4. This sets the controller's I²C address
- **Port**: Select the computer's USB-port (COM) connected to the Comm card.

- **Axis**: choose Axis 0

The Info panel displays the Comm cards program information.
6.2 Operating the RS-08 from the NanoCommander

The NanoCommander SW allows running commands using the following methods:

- Running **manual commands** (I²C commands)
- Running command **scripts** (script examples provided with the application)
- Direct command-initiating buttons

### 6.2.1 Manual Commands

The Manual Commands area allows running direct commands by either pressing on a command button (i.e. Calibrate), moving a slider, or by entering an I²C command code and parameters.

### 6.2.2 Running Scripts

The system is provided with predefined scripts, allowing the user to quickly and easily operate the shutter. The Eval Kit has a standard test script in ...

To execute a script:

In the **Script Command area**, perform the following:
6.3 The FPGA Mode Configuration

When using the FPGA Mode, the Shutter-Eval-CL system is connected to the user’s FPGA, and the Shutter Module ASIC is controlled via \(\text{I}^2\text{C}\) communication.
